Remarks:

1. In case of most courses Learning outcomes have been stated reasonably well. But very often it is not clear which metric or assessment tool has been used to measure which outcomes. This mapping between tool and outcome needs to be addressed better in next semester's report.
2. In case of few courses, some recommendations have been put forward which are not implementable in view of department's resource constraints. Teaching assistants, tutoring centers etc are must when the subjects are math and physics, but it is unlikely that we are ever going to get them.
3. ILO Assessment Report for Fall 2015 is in progress for submittal to the department Chair.
4. A word of thanks before I conclude this narrative. During the preparation of SLO reports for summer 2015, several DMP faculty members have called or met Dr. Norman Swazo to seek his assistance to prepare their ILO reports. I have been told that Dr. Swazo has always graciously helped them.
