Two FA Authentication

Successfully enabled Two FA

Two FA:

☒ Enable

Save

After saving you will see a success message like this. Now Logout from here and log back in for the 2FA setup window

After logging in you will get a window like this. Download any Authenticator of your choice and scan this QR code to get the code.

We recommend Google Authenticator app for Android and the default Pssword Manager for iOS

Setup Two-Factor Authentication

Scan this code using Authenticator

Or use this secret key:

6YMS5E5M30ICRKQJREMB4V3JE5L5DRFP [Copy](#)

Enter 6-digit code from your authenticator app

[Verify & Enable 2FA](#)

Authenticator installed on this device? [Open Authenticator](#)

After scanning/adding the key to your mobile device, you'll see a temporary code on the APP. Enter it and click "Verify and Enable 2FA" .

From now on, you will need a code from the APP everytime you login, so **DON'T DELETE THE APP OR YOUR KEY FROM THE APP!**

RDS

2FA Has been set up successfully !
